The image shows a JupyterLab interface with a single code cell. The command `pip install qiskit` has been entered. The interface includes a menu bar (File, Edit, View, Run, Kernel, Settings, Help) and a toolbar with various icons for file operations and execution. The status bar at the bottom indicates 'Python 3 (ipykernel)'.

The image shows the same JupyterLab interface after executing the command. The output of the command is displayed in the code cell. It shows the process of collecting and downloading various packages and their dependencies, including qiskit, rustworkx, stevedore, symengine, and pbr. The output also shows the progress of downloading the qiskit wheel file.
